CAUSE OF DEATH in plain terms, so that any one may understand it. Indefinite answers, such as "Fever," "Debility," "Old Age," "Consumption," "Dropsy," "Cancer," "Tumor," "Abscess," "Child-birth," "Accident," "Injury," "Fracture," without stating the organ affected, are not sufficient. Name the disease causing death, or, if from violence, state the means of injury. State whether accidental, suicidal or homicidal. Be particular and state fully. Do not use abbreviations or technical terms. Omission to answer any of these questions may greatly delay the issue of certificate, and in case of deaths from violence, or where the cause is not fully stated, will necessitate the holding of an inquest. Every question should be answered, and if any of the questions are deemed important, See instructions on back of certificate.
